

# Maritime Legal Assistance

**Maritime legal assistance** refers to legal support, advice, representation, and guidance provided to individuals, seafarers, shipowners, maritime companies, and other stakeholders in the maritime industry to address legal issues arising from maritime operations, contracts, employment, disputes, and regulatory compliance. This assistance helps protect rights, resolve disputes, and ensure compliance with international, national, and commercial maritime laws.

In the context of *UB Sea & Shore Services*, maritime legal assistance forms part of their range of services aimed at supporting seafarers and maritime professionals in non-operational and administrative matters beyond employment facilitation.

### **3. Why Maritime Legal Assistance is Important**

Maritime and admiralty law governs activities at sea and in navigable waters, covering everything from employment contracts and ship operations to disputes between parties such as shipowners, seafarers, insurers, and cargo interests.

Some key areas where legal assistance is frequently required include:

- **Seafarer rights and claims** — such as wages, shore leave rights, repatriation, medical care, and contract enforcement.
- **Accidents and injuries** — legal help following a maritime accident, injury, or loss at sea.
- **Contract disputes** — including charterparty agreements, carriage of goods contracts, and employment contracts.
- **Regulatory compliance** — ensuring compliance with international maritime conventions, environmental laws, safety regulations, and labour standards.

Legal assistance protects stakeholders by offering clarity on complex legal frameworks that span both **national laws** and **international maritime conventions**.

### **4. Core Principles of Maritime Law (Contextual Background)**

To understand why maritime legal assistance is necessary, it helps to grasp basic principles of maritime law:

- **Admiralty/Maritime Law:** A specialized body of law that governs maritime activities, disputes, and contracts in navigable waters and international shipping.
- **International Conventions:** Many maritime legal obligations are based on treaties such as the International Convention on the Safety of Life at Sea (SOLAS), Law of the Sea, and maritime labour standards.
- **Dispute Resolution:** Maritime law provides mechanisms for handling disputes that may arise out of collisions, cargo loss, injury, employment claims, or contract breaches.
